

UI Green Metric

World University Rankings

UI GreenMetric World University Rankings

UI GreenMetric World University Rankings was established in April 2010 in order to provide a profile for and way of comparing the commitment of universities towards going green and promoting sustainable operation. The ranking process has been completed six years since then. It is expected to promote awareness in institutions of higher education of the value of putting in place policies and systems that will have a positive impact on global warming and climate change, particularly those that help reduce carbon emissions through efficient energy use, and alternative forms of transport, greening the campus and waste recycling. Policies and management practices should also include ways of communicating the importance of the endeavor and finding ways of involving everyone and helping them to contribute with supportive behaviors.

What about the Ranking ?

The aim of this ranking is to provide the result of online survey regarding the current condition and policies related to the greening of campuses and improving sustainability in universities all over the world. It is expected that by drawing the attention of university leaders and stakeholders, more attention will be given to global climate change, clean energy and water conservation, waste recycling, and green transportation. This will require increased awareness and a change in the behavior of many if we are to see it happen.

Participating Universities within UI GreenMetric Network 2016

What are the Benefits of Participation?

Internationalization and recognition

Participation in UI GreenMetric can help the university's efforts in internationalization and recognition by getting its sustainability efforts on the global map.

01

Awareness rising of sustainability issues

Participation can help to raise awareness in the university and beyond about the importance of sustainability issues.

02

Social Change and Action

UI GreenMetric is primarily about awareness raising, but in the future it will be adapted to encourage real change.

03

Networking

In this network, participants can share their best practices in sustainability program(s) as well as networking with other participants worldwide by attending the annual UI GreenMetric's International Workshop and regional/national workshops hosted by approved host universities.

04

the Benefits of Participation

What is the Methodology?

In the current performance evaluation tool there are 38 indicators and 6 criteria i.e setting infrastructure, energy climate change, waste, water, transportation and education.

Criteria & Indicator

UI GreenMetric Ranking Criteria in 2017

Who are the Participants?

The number of universities that have provided data in order to take part has shown a growth trend. In the first year, In 2010 UI GreenMetric published the ranking for 95 institutions. In the second year, the number published in the ranking was 178. Last year, the number published in the ranking was 515 from 75 countries. The basic ranking results and the detailed scores can both be found online at <http://greenmetric.ui.ac.id/overall-ranking-2016/>.

The number of universities participating has increased significantly since 2010. It started with 95 universities from 35 countries in 2010 and rose to 515 universities from 75 countries in 2016.
