

UI GREENMETRIC WORLD UNIVERSITY RANKINGS

The First World University Rankings on Sustainability in The World

UI GreenMetric World University Rankings

UI GreenMetric World University Rankings was established in April 2010 in order to provide a profile for and way of comparing the commitment of universities towards going green and promoting sustainable operation. The ranking process has been completed six years since then. It is expected to promote awareness in institutions of higher education of the value of putting in place policies and systems that will have a positive impact on global warming and climate change, particularly those that help reduce carbon emissions through efficient energy use, and alternative forms of transport, greening the campus and waste recycling. Policies and management practices should also include ways of communicating the importance of the endeavor and finding ways of involving everyone and helping them to contribute with supportive behaviors.

What about the Ranking ?

The aim of this ranking is to provide the result of online survey regarding the current condition and policies related to the greening of campuses and improving sustainability in universities all over the world. It is expected that by drawing the attention of university leaders and stakeholders, more attention will be given to global climate change, clean energy and water conservation, waste recycling, and green transportation. This will require increased awareness and a change in the behavior of many if we are to see it happen.

What are the Benefits of Participation?

Internationalization and recognition

Participation in UI GreenMetric can help the university's efforts in internationalization and recognition by getting its sustainability efforts on the global map.

Awareness rising of sustainability issues

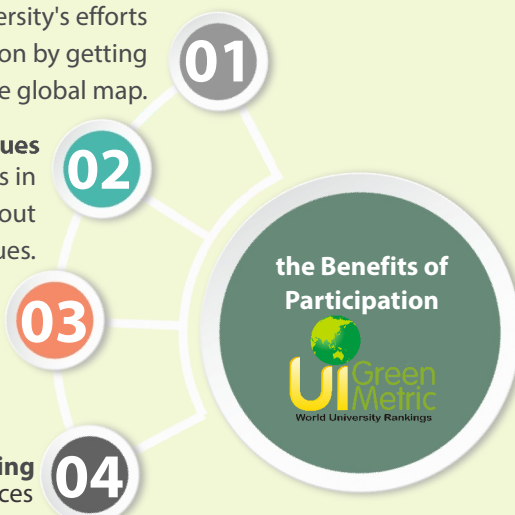

Participation can help to raise awareness in the university and beyond about the importance of sustainability issues.

Social Change and Action

UI GreenMetric is primarily about awareness raising, but in the future it will be adapted to encourage real change.

Networking

In this network, participants can share their best practices in sustainability program(s) as well as networking with other participants worldwide by attending the annual UI GreenMetric's International Workshop and regional/national workshops hosted by approved host universities.

What is the Methodology?

In the current performance evaluation tool there are 38 indicators and 6 criteria i.e setting infrastructure, energy climate change, waste, water, transportation and education.

UI GreenMetric World University Rankings Criteria in 2019

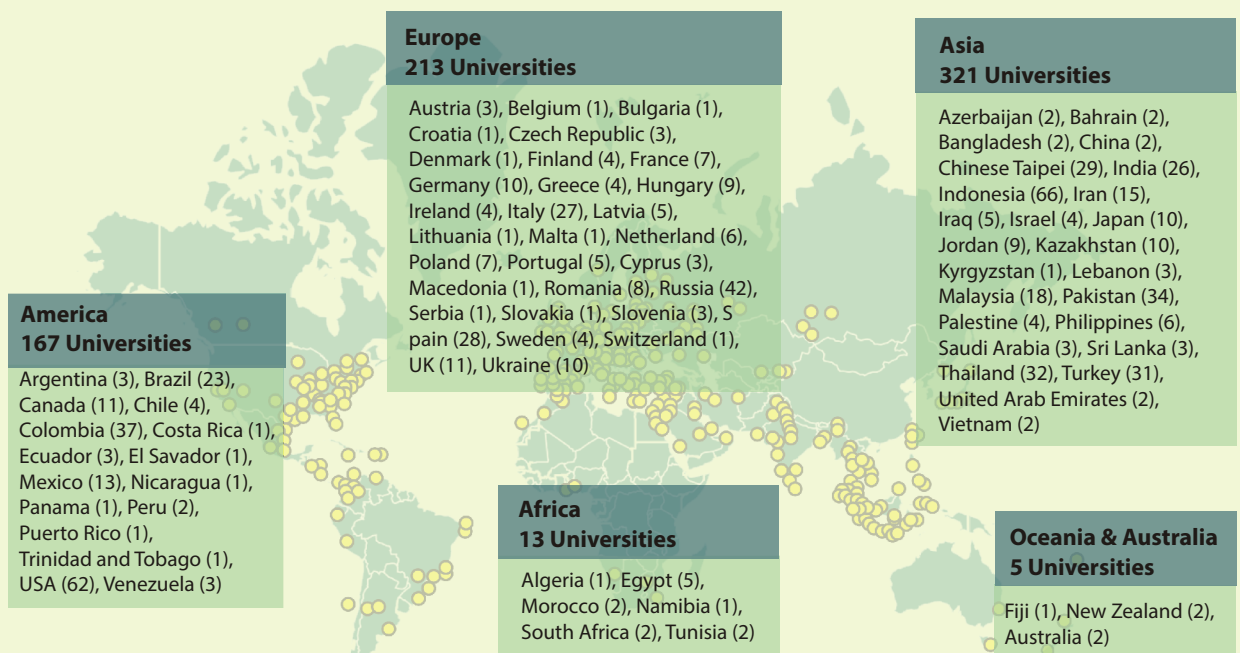

Who are the Participants?

The number of universities that have provided data in order to take part has shown a growth trend. In the first year, In 2010 UI GreenMetric published the ranking for 95 institutions. In the second year, the number published in the ranking was 178. In 2017, the number published in the ranking was 619 from 76 countries.

The number of universities participating has increased significantly since 2010. It started with 95 universities from 35 countries in 2010 and rose to 719 universities from 81 countries in 2018. The basic ranking results and the detailed scores can both be found online at <http://greenmetric.ui.ac.id/overall-ranking-2018/>.

Important Dates

How to Take Part?

Submitting data for the ranking is relatively easy and is currently done using an online system. There is no registration fee required for taking part. If your university would like to join UI GreenMetric and have not received any invitation,

Please register via :

<http://greenmetric.ui.ac.id/registration-page/>

We would very much like to have you join us. If you have already taken part, please continue.
